

RULEBOOK

Elevate your visualization skills here

As an engineer visualization skills are important as we have to visualize the product before its made. This event tests the creativity of participants and spontaneity of participants as the time is limited. It will help participants to improve individual visualisation skills which will prove to be a huge asset for industrial works.

Rules:

- 1) Plan will be provided at the start of the event
- 2) Suitable sections will should be designed in 5 hours with 30 min break in between.
- 3) Cost estimation should be done for necessary elements.
- 4) Participants need to install the AutoCAD software
<https://www.autodesk.com/education/edu-software/overview?sorting=featured&filters=individual>
- 5) Participation certificate will be provided to all participants.
